## Spring Valley Water Supply Corporation

### Stage 2 Water Restrictions

Dear Spring Valley Customers,

A water shortage continues to exist as pumps can't keep up with demand. Starting August 18, 2022 Spring Valley will implement **Stage 2 water rationing**.

It is strongly recommended that each member do their part to conserve the use of water to avoid a disruption in delivery. We are currently utilizing in excess of 90% of our available water as a result of drought conditions and high demand. In the event consumption reaches 95%, Stage 3 will be implemented which restricts all outdoor watering. Please take note of the change in the watering schedule below.

Your watering schedule is shown below.

Houses ending in an Even Number	Houses ending in an Odd Number
Monday & Friday	Tuesday & Saturday

### **NO WATERING ALLOWED BETWEEN THE HOURS OF 9 AM & 7 PM**

#### Voluntary Practices to Reduce Water Consumption

- Draw less water for bath or reduce shower time.
- Do not let water run while shaving, dish washing, brushing teeth, etc.
- Keep pools covered if not used on a daily basis.
- Use water displacement device in toilet tank.
- Install aerators on faucets.
- Utilize water reuse where possible.
- Replacement or retrofits with low flow or ultra-low flow fixtures.
- Visit the Water Sense web site at <http://www.epa.gov/WaterSense>.

- 1st Violation** - Warning
- 2nd Violation** - Flow restrictor installed for 3 days.
- 3rd Violation** - Flow restrictor installed for duration of rationing.

**Customer will be notified when the rationing of water will be no longer needed**
